

T4

USER-FRIENDLY SUPPLY PEDESTAL DESIGNED FOR MODERN MARINA AND CAMPER LIFE

Tallykey T4 is a user-friendly supply pedestal for power and water in marinas and campsites. The elegantly designed supply pedestal is robust, and has several applications. Among other things, it offers dimmed light, so your guests can see what they are doing, while an energy-efficient LED lamp provides a mood setting atmosphere on the piers and harbour. T4 complies with all EU-standards and is maintenance free, which ensures problem-free daily use. The pedestal is available in a number of high-quality models, and besides power and water supply for your guests, it also offers the possibility for remote control and reading of power through our administrative systems Tallyweb and Tallybee. It can also be used as lighting source at night. Safety and user-friendliness are in focus. The individual relays, meters and joint code keyboard with touch-free card reader are placed safely behind a storm-proof and self-closing front lid. The panel is straightforward and easy to operate, and the power pedestal can always be equipped, combined, and extended according to your needs and wishes.

Quality that survives many years of outdoor use

All Tallykey supply pedestals are developed and manufactured in our factory in Denmark, where skilled employees use robust and durable materials. Our products comply with all EU-standards and legal requirements for this type of installation. The pedestal is made of anodised aluminium, while bolts, shafts and screws are made of acid-proof steel, which means minimal maintenance. You will always be able to welcome your guests to an efficient marina or harbour in beautiful surroundings.

INFORMATION ABOUT THE T4 PEDESTAL:

The pedestal is 106 or 126 cm and is made of anodized aluminium and impact-resistant plastic with an LED lamp of 7 watts.

The pedestal can be mounted directly in e.g. a wooden pier with strong bolts, or mounted on a pole for embedding to make sure it is stable.

The pedestal/outlets are available as IP44 and 67.

Power outlets:

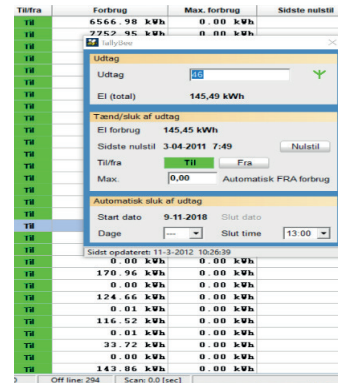

The pedestal is available with 1-4 outlets. Max. 63A (3-phase).

Water: The pedestal is prepared for two water taps. Max. 5 bar. Option for straight and angled in 1/2" or 3/4".

Tallyweb: A radio with built-in operation panel on the pedestal enables switch on/off for power and water with individual code.

TallyBee: It is possible to switch on/off power and read consumption from your PC using radio signals.

ACCESSORIES FOR T4:
